New Unit Improves Ventilation of Barn

Dairymen Find Device Particularly Effective

Many of a cow's troubles can be traced to heat and humidity. A cow, unlike a human being, can perspire only through the mouth. So when the temperature and humidity inside a barn get high, the animal becomes uncomfortable and stubborn, particularly at milking time.

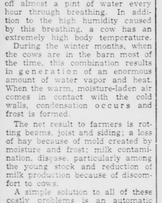
According to the department of agriculture, an average cow gives off almost a pint of water every hour through breathing. In addition to the high humidity caused by this breathing, a cow has an extremely high body temperature.

During the winter months, when the cows are in the barn most of the time, this combination results in generation of an enormous amount of water vapor and heat. When the warm, moisture-laden air comes in contact with the cold walls, condensation occurs and frost is formed.

The net result to farmers is rotting beams, joist and siding; a loss of dairy space because of mold created by moisture and frost; milk contamination, disease, particularly among the young stock and reduction of milk production because of discomfort to cows.

A simple solution to all of these costly problems is an automatic cooling unit, now in growing popular with dairy farmers.

These automatic ventilation units easily installed, reduce condensa-



Picture on Vernon Julins farm at Freeport, Ill., shows installation of automatic cooling unit in dairy barn.

tion to a negligible degree — less than 2 per cent. This action, in turn, decreases barn deterioration, hay mold, milk contamination and disease. It also provides much more comfort for the cows and increases milk production. In addition, working conditions for the operator are much more pleasant.

The cooling units are equipped with an automatic "airswitch" thermostat.

Higher Yields Outweigh Cattle Spraying Costs

An increase of $3.75 per head more than covers the cost of spraying beef cattle with DDT, it was revealed in a test of the value of fly control conducted at the University of Illinois college of agriculture.

Protected cattle gained about 15 pounds more per head during the pasture season than a group that had not been sprayed. At 25 cents a pound, an increase of 15 pounds a head amounts to $3.75 a head, a return that far outweighs the cost of spraying.

Beef cattle should be sprayed often enough to control flies, whether it requires two or three sprayings during the season or once a month.

Herds and Flocks

Use of 2, 4-D sprays for weed control in pastures is not dangerous to grazing animals.

A home-mixed spray of crude benzene hexachloride powder and water is more likely to taint eggs in poultry houses than a good commercial roost paint containing the effective portion of the same chemical.

Poultry houses with light colored roofs are cooler in summer than those with roofs painted black.

To get water to hogs in distant pasture where there is no water supply, pipes can be laid on top of the ground. To prevent freezing in winter, disconnect and drain the pipes.

Benzene Hexachloride Will Check Hog Mange

If hogs stand around and rub instead of eating, they may have a touch of mange. Benzene hexachloride has been found to be more effective than lime sulphur. Benzene hexachloride should be applied when temperatures are up around 75 degrees, using one pound of 50 per cent powder to four gallons of water. It is important to see that the animal is completely covered including the inside of the ears.

Wheat Yield Boosted Through Fertilization

Gains in Indiana Tests Exceed Seven Bushels

Fertilizing wheat paid dividends in crop increases averaging seven to nine and one-half bushels per acre, Purdue university research men revealed in announcing results of 1947 studies conducted in 15 Indiana counties.

Wheat yields increased seven bushels per acre when fertilizer applications averaged from 150 to 200 pounds per acre. When the plant food treatment was boosted to 300 to 400 pounds per acre, average production gains of nine and one - half bushels were obtained.

Demonstrations with wheat started on various soil types last fall showed somewhat similar results, according to the Purdue research men. When 165 pounds of 0-12-12 was applied on six soil areas in southern Indiana upland soils, increases of five bushels per acre resulted. When the application was doubled, yield increase averaged seven bushels per acre.

Applications of 300 to 350 pounds of 3-12-12 were recommended for wheat on practically all upland silt or clay loam soils and for sandy loams, says a statement by the Purdue agronomy department. The 3-12-12 cannot be obtained then 2-12-6 is a good substitute for the wheat crop. The additional potash in the 3-12-12, however, is especially important for the clover and corn crops following the small grain."

Machinery Is Revamping Farming in Cotton Belt

Nearly a million tractors today are in action on farms in the 18 cotton-producing states, saving time and labor in nearly every phase of cotton production. The invasion of machinery into the South's white cotton fields is eliminating the back-breaking task of producing the cotton crop.

Man's mechanical helpers achieve in a few hours what formerly took days of costly human labor. For example, the flame cultivator, attached to a tractor, removes grass and weeds from the field at one-tenth the former cost.

An experiment in the coastal plains area of North Carolina showed that while 113 man hours are required to produce an acre of cotton by the old man-mule methods, use of two-row tractor equipment, mechanical choppers, flame cultivators and machine pickers cuts the man-hour requirements to 19.7 per acre.

Machines capable of harvesting a bale of cotton in slightly more than an hour are now a reality instead of a remote possibility. While the average hand-picker gathers about 15 pounds of seed cotton an hour, a single mechanical picker in the same field harvests about 1,500 pounds in 2 hours, 20 minutes. Thus, the mechanical harvester accomplishes the work of 40 to 50 human pickers.

Internal Parasites Loot Farmers of Huge Toll

Few criminals ever dream of committing a 125 million dollar robbery. But that's the amount internal parasites steal from the U. S. livestock industry every year. Because the parasites are hidden, the farmer never will see the thieves at work. However, they keep right on causing losses day and night.

Parasites cause diseased animals and poultry to eat more grain and other feeds than healthy stock eat. They stunt the growth of young animals and sometimes kill them. Affected animals generally bring lower prices when shipped to market.

Internal parasites can be controlled. Phenothiazine, carbon tetrachloride, hexachlorethane, sodium fluoride and carbon disulfide are used to fight certain types of parasites. The advice of a local veterinarian should be secured to determine the proper method of treatment.

Spoilage of Stored Grain Hinges on Bin's Condition

Grain can be stored almost indefinitely with little deterioration in farm-type bins — those that hold 1,000 to 3,000 bushels—if the bins are kept dry, cool, clean and free of insects, according to the USDA. For control of insect infestation, chief reliance must be placed on fumigation. Shelled corn has been stored for several years with a loss of less than 1 per cent, according to official reports.

Spout Spring

Spout Spring, Sept. 1.- Mr. and Mrs. W. J. Walton and son and daughter were guests of Mr. and Mrs. George Carson Sunday.

Miss Sue Davidson is visiting Mrs. Lizzie Bonnett, in Portsmouth.

Mrs. Hunter Jamerson entertained at dinner last Sunday to honor the birthdays of Mrs. Jesse Reynolds and Mrs. Lonnie Reynolds. Those present were Mr and Mrs. Jesse Reynolds, Mr. and Mrs. Lonnie Reynolds and son, Mr. and Mrs. Lonnie Reynolds and daughter, Dr. Mosby Payne, Mr. and Mrs. Carl Martin and daughter, Mr. and Mrs. Russell Martin and daughter, Mrs. Florine Phelps and Mr. and Mrs. Lyle aDvidson.

Spraying in Summer Will Not Halt Grubs

Destroying Eggs Fails To Stop Winter Attack

Spraying cattle in summer with benzene hexachloride, rotenone or other insecticides, new or old, does not prevent grub infestation in winter.

Although there is nothing new in that statement, the need for repeating it is plainly indicated by an account of spraying dairy cattle in one of the corn belt states. The work was given considerable publicity, with erroneous conclusions.

In this case, older animals of the herd were sprayed with DDT. Heifers and calves were not sprayed because they were running in pas-

Dipping method is favored by some cattlemen to control grubs and other infestations.

ture. Spraying them would have required getting them up and handling them.

The following winter, it was noticeable that the cows which had been sprayed were not infected with grubs. The young stuff was peppered with them. The natural conclusion was that a summer spray of DDT was effective.

That conclusion is unwarranted because, as entomologists know, older cattle seldom if ever have grubs on the heel fly. The young animals are the ones that suffer.

The department of agriculture says: "Many substances have been applied to cattle to keep away heel flys and to kill the eggs deposited on the legs of the animals. All have been found to be either ineffective or impractical. The best time for attacking the pest is when the grubs are in the backs of cattle."

U. S. Farm Workers

U. S. land army of farmers, working members of their families and hired helpers totaled 10,368,000 on May 1, 1948. Total U. S. population is now about 140 million, so each farm worker must feed himself and 12 other U. S. residents before having any surplus for export. The number of farm workers on May 1 was about 100,000 greater than on the same date in 1947.

CLASSIFIED SECTION

CARD OF THANKS:
We wish to thank our friends and relatives for the kindness shown us during the illness and death of our wife and mother, Mrs. L. J. Morris. Also for the flowers, cards and use of cars. — L. J. Morris, Mr. and Mrs. Garland Morris.

CARD OF THANKS
We wish to express our appreciation to our relatives and friends for flowers, cards and deeds of kindness shown us during our recent bereavement.
—Mr. and Mrs. Harry Jarrell.

Miss Dorothy Sears, of Petersburg will spend this week-end here.

Mrs. W. H. Conner left today for Rocky Mount, N. C., to attend the funeral of her brother-in-law, Mr. Frank Draine.

Mr. and Mrs. Ben Saunders and children, of Richmond have been guests of Mr. and Mrs. C.C. Cralle.

Mrs. James A. Conner, of Roxboro, N. C. spent Sunday with her mother, Mrs. W. P. Gills.

Mrs. Wm. A. Copenhaver will return to Richmond Monday after spending the summer here with her mother, Mrs. W. P. Gills.

Misses Myrtle and Caroline Smith and Tom Smith spent several days this week at Urbanna.

Mr. and Mrs. W. W. Ford, Jr. spent the week-end at Blacksburg.

Mr. and Mrs. H. Y. Spencer, Miss Frankie McKinney and Dr. C. H. Swing are spending this week in New York.

Mrs. William B. Brown, of Narrows spent last week with her parents, Mr. and Mrs. A. M. Johnston.

Miss Iris Ely, neice of Mrs. Johnston, and a member of the faculty of Radford College, is also visiting the Johnston's.

J. Whitney Evans left today for Carthage, Tenn., where he will visit his son, Dr. John W. Evans, Jr., returning home Sunday. He will attend the 10th annual Tennessee Walking Horse Show at Shelbyville.

Mrs. B. G. Anderson will leave Friday to visit relatives in La-Follette, Tenn. She will return on September 9th.

Mrs. H. B. Marshall, of Roanoke is spending this week at her country home near here. Her guests for the week-end will include: Mrs. T. T. Marshall, Mr. and Mrs. Glenn Marshall, of Portsmouth, Ohio; Mr. and Mrs. Roy Marshall, of Circleville, Ohio, and Dr. and Mrs. Eugene Marshall, of Berea, Ky.

Judge Joel Flood will enter the University Hospital at Charlottesville today, for a sinus operation.

Miss Kate O'Brien returned to Farmville Tuesday after spending some time at her home near here.

Richard McDearmon, of Richmond spent the week-end here.

Mrs. R. W. Burkey and Miss Nola Burkey have returned from a trip to Norfolk.

Miss Mildred McDearmon will leave Friday for Columbia, S. C., after spending the summer here.

Miss Mary Frances Cheatham, of New York arrived last night to spend ten days with her mother, Mrs.Frances Cheatham.Miss Cheatham's guest for the week-end is Theodore Spence, of New York.

Mr. and Mrs. F. T. Cawthorn, Jr. and children have returned to their home in Petersburg, after spending several weeks here with his mother, Mrs. Eva Cawthorn.

DEATHS

MR. ROYAL J. COLEMAN

Appomattox County lost one of its fine citizens last Friday, when Mr. Royal J. Coleman died at his home near Oakville. He had been in declining health several months.

Mr. Coleman was born in this county on July 15, 1888, the son of the late prominent Confederate veteran, Charles H. Coleman, and Susie Branch Coleman. He was a successful farmer and a leader in Trinity Methodist Church.

He is survived by his wife, Mrs. Mary Martin Coleman; eight children: Royall M. Coleman, James Ralph Coleman, Kenneth Edward Coleman, Mrs. Percy J. Reynolds, Mrs. Willie R. artin, Mrs. Samuel W. Inge, all of Lynchburg; Mrs. Thomas B. Coleman, of Buckingham; and Harwood Coleman, of Appomattox; his step-mother, Mrs. Edmonia Coleman; three sisters: Mrs. India Scott, Mrs. Irene Rogers and Mrs. Clarence F. Moore; and two brothers, Branch Coleman and Taylor Coleman.

Funeral services were held at the grave at Rebecca Cemetery at 11 A. M. Sunday, conducted by the Rev. D. M. Spence. Active pallbearers were: Floyd Coleman, Terry Rogers, Melvin Drinkard, Charlie Martin, Russell Martin and Otho Martin, Jr.

DEATH OF INFANT

Graveside services were held Friday, August 27, in Liberty Baptist Cemetery, conducted by the Rev. J. Marshall Walker, for the one day old son of Mr. and Mrs. Harry W. Jarrell. Besides his parents, he is survived by his grandparents, Mr. and Mrs. E. O. Jarrell and Mr. and Mrs. Robert Doss.

MRS. LUTHER J. MORRIS

Mrs. Alice Proffitt Morris, 56, wife of Luther Jackson Morris, died at her home here Sunday night after an illness of several months.

She was born in Nelson County, daughter of Mrs. Katherine May and the late Norbon A. Proffitt.

She had been active in the civic and church activities of the town since moving here about 34 years ago. She was a member of the United Daughters of the Confederacy, the W. C. T. U., and the Woman's Missionary Society of the Liberty Baptist Church, in which church she held membership.

Funeral services were held at the church Tuesday at 3:00 P. M., conducted by the Rev. J. Marshall Walker. Interment was in the Morris plot in Liberty Cemetery.

Besides her husband and mother she is survived by one son, Garland J. Morris, of Newport News; and the following brothers and sisters: Norbon H. Proffitt and Mrs. Robert H. Bibb, of Baltimore, Md.; Mrs. George G. Jones, of Guild, Tenn.; Clarence E. Proffitt, of Arrington; Mrs. Clarence J. Humphrey, of Coleman, Fla., and Mrs. J. Aubrey Spencer, of Tye River.

Active pallbearers were: F. L. Murphy, J. W. Cawthon, L. Crawley, H. W. McKinney, C. W. Smith and A. R. Harwood.

MR. JOEL W. DICKERSON

Mr. Joel Wise Dickerson, 68, of Pamplin, died at his home Saturday morning after a brief illness.

Funeral services were field at the Cullen Baptist Church Monday afternoon at 4 o'clock, conducted by the Rev. G. A. Harris. Interment was in the church cemetery.

Mr. Dickerson was born in Appomattox County September 22, 1879, and was the son of the late Mr. and Mrs. John Benjamin Dickerson.

Besides his wife, Mrs. Mattie Williams Dickerson, he is survived by one daughter, Mrs. Virginia Cassie Hamlett, of Phenix; three sons: Benjamin W. Dickerson, of Alexandria,La.;Willie Wilson Dickerson and Joel Davis Dickerson, of Farmville.

MRS. SARAH EDMONDSON

Mrs. Sarah Brown Edmondson, 87, died at her home near Hixburg yesterday morning, after an illness of 8.c months. Funeral services will be held at the grave at the Hixburg Baptist Church Cemetery Friday at 3:00 P. M.

She was born in Appomattox County, daughter of the late Jesse and Sarah E. Frankiin; she was twice married. Her first husband was Conrad Richard, Brown, who died in 1908. She was a member of Hollywood Baptist Church. She is survived by two sons, William Brown, of Appomattox, and Conrad Brown, of Pamplin; four daughters Mrs. J. B. Burley, of Pamplin, Mrs. W. W. Woodall, of Lynchburg; Mrs. E. L. Hurdle, of Baltimore, Md., and Mrs. J. E. Dunaway, Jr., of Detroit, Mich; seven grandchildren and 15 great grandchildren.

MISSION STUDY CLASS

Mission Study classes for the W. M. S., Y. W. A.'s and Sunbeams were taugh last Wednesday night at Spout Spring Baptist Church.

Forty-five attended.A social hour and refreshments were enjoyed after the classes. The G. A.'s held their class during Focus Week.
